TEJASWI TALLAPALLY

UX ENGINEER | PRODUCT DESIGNER | FRONT-END DEVELOPER

Boston, MA | +1 (857) 506-4211 | tejgwd972@gmail.com | www.linkedin.com/in/tejaswi-tallapally-545ab82ba

PROFILE

UX Engineer and Product Designer combining user research, interaction design, and front-end development to create intuitive, accessible digital products. Experienced in translating user and business needs into flows, prototypes, design systems, and responsive interfaces using Figma, React, TypeScript, JavaScript, HTML, and CSS. Brings a practical understanding of WCAG 2.2 AA, AI-enabled experiences, and cross-functional collaboration from concept through implementation.

SKILLS

UX/UI & Product Design: User Research, Information Architecture, Interaction Design, Wireframing, Prototyping, Usability Testing, Personas, Journey Mapping, A/B Testing, Competitor Analysis

Design Tools & Systems: Figma, Adobe XD, Design Systems, Component Libraries, Design Tokens, Responsive Design, Developer Handoff

Front-End Development: React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux

Back-End Development: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)

Accessibility & Testing: WCAG 2.2 AA, ARIA, Inclusive Design, Jest, React Testing Library, Storybook

Data & Collaboration: SQL, NoSQL, Power BI, Git, Jira, AI-Assisted Design Tools, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

UI/UX Design Intern
April 2024 – August 2024

Quantana | Hyderabad, India

- Designed end-to-end experiences for 3+ client onboarding projects, translating requirements into user flows, wireframes, and high-fidelity Figma prototypes; contributed to approximately 30% fewer design revision cycles.
- Conducted user research and synthesized findings into personas and journey maps; applied those insights to an LLM-powered speech-learning prototype with practice flows, speech-to-text interactions, AI-generated feedback, and streak-based learning paths.
- Redesigned an AI-powered learning platform by restructuring navigation, course layouts, and progress tracking, and supported design validation through A/B testing and iteration.
- Built a reusable UI component library and developer handoff documentation to improve design consistency and reduce implementation ambiguity.

Business Development Associate
November 2021 – April 2023

Synergy Coatings | Hyderabad, India

- Collaborated with marketing, operations, and product teams to improve the digital product catalogue's UX and navigation, contributing to a 15% increase in new client acquisitions.
- Partnered with operations and customer service to simplify order-management workflows and improve tool usability, supporting a 98% on-time delivery rate quarter over quarter.
- Built Power BI dashboards to visualize customer and business trends and support data-informed sales targeting.
- Created interactive web presentations to communicate product and customer insights to internal teams and prospective clients.

PROJECTS

InsureFlow | AI-Assisted Insurance Claims Platform
Figma | UX Research | Journey Mapping | AI Prototyping.

- Mapped the insurance claims journey and designed a guided submission flow with clear requirements and next steps.
- Designed an adjuster dashboard to organize claim details for faster review, comparison, and decision-making.
- Prototyped AI-generated claim summaries to support adjuster decisions while maintaining human oversight.

Paws&Tails | Pet Adoption Platform
React.js | Node.js | MongoDB | REST APIs.

- Designed and developed a pet adoption platform with searchable listings and filters, helping prospective adopters browse pets and narrow results by preference.
- Integrated REST APIs for pet listings, search, and filtering, and implemented JWT authentication with role-based access control to manage user access and permissions.
- Built browsing and discovery flows around pet profiles and adoption-related actions, creating a clearer path from exploring listings to identifying suitable matches.

Accessible Patient Portal
WCAG 2.2 AA | Accessibility Design | Figma | Inclusive Design.

- Applied WCAG 2.2 AA accessibility principles and reusable patterns to create a consistent, inclusive portal.
- Designed patient workflows for appointment booking, lab-result access, and patient-provider messaging in one unified portal
- Considered older adults and caregivers when shaping navigation, content hierarchy, readability, and interaction patterns, emphasizing clear labels and straightforward task flows.

EduFlow | E-Learning Platform
Figma | Wireframing | Prototyping | Usability Testing.

- Designed an e-learning experience for course discovery, enrollment, and learning-progress tracking, connecting these stages through clear user journeys and task-focused information architecture.
- Used usability testing and iterative design to identify friction points, then refined accessible and reusable UI patterns to make key interactions more straightforward.

- Structured navigation and course content to help learners find relevant material and understand progress; prepared component documentation and developer handoff guidance to support design-to-code consistency.

Component Library & Design System

Figma | Design Tokens | Component Libraries | Design Systems.

- Created a reusable Figma component library to establish consistent patterns and repeatable building blocks across product screens
- Organized design tokens, component styles, and light/dark themes to simplify maintenance as the system grows.
- Applied object-oriented programming principles to organize application logic and support maintainable functionality.

TastyConnect | Recipe Finder Application

Java | JavaFX | MongoDB | REST APIs.

- An application interface built with JavaFX, FXML, and CSS, enabling users to create accounts, share recipes with photos, browse dishes, submit reviews, and manage their own posts.
- Integrated MongoDB for user, recipe, and review management, implementing an MVC architecture and ingredient-based recipe ranking with related-dish recommendations.
- Connected the Open Food Facts REST API to fetch nutritional data using JSON parsing and asynchronous processing.

EDUCATION

Northeastern University, College of Engineering — May 2025
Master of Science in Information Systems — Boston, MA

G. Narayanamma Institute of Technology & Science (JNTUH) — June 2021
Bachelor of Technology in Information Technology — Hyderabad, India
